Dear Angus

Use of Type C4 Non-Flowable Structural Materials for Reinstatement (SMR) in Utility Reinstatements

I refer to the 2 year trial of Type C4 Non-Flowable Structural Materials for Reinstatement (SMR) undertaken by Scottish Water in the Glasgow City Council area, which was completed on 5 June 2015 and note the contents of the Trial report provided.

I would advise you that in accordance with Section A9.5.2.5 of the Specification for the Reinstatement of Openings in Roads (January 2015), the Ayrshire Roads Alliance would like to register approval, on behalf of South Ayrshire Council and East Ayrshire Council, for the use of Type C4 Non-Flowable Structural Material in reinstatements by Scottish Water.

Yours sincerely,

Stewart Turner
Head of Service
Ayrshire Roads Alliance
